

Wireless Technology Breakthrough!

Update your stock and pricing in seconds!

No action required at POSperfect!

So simple and easy to use

The Datalogic Memor™ is small and slim, with excellent ergonomics for single-handed use.

Weighs in at 210g!

The latest Wireless technology means the Datalogic Memor™ can update POSperfect from the shop floor!!

Stocktakes:

Do a SKU or PLU stock on-hand count on the Datalogic Memor™ and post the document to POSperfect!! 64Mb RAM and 128Mb Flash memory allows full or partial stocktakes. No need to go back to the PC!

Shelf Replenishment:

Create an order from the shelves. Create the document on the Datalogic Memor™ and release it to POSperfect!

Price Update:

Raise the relevant SKU or PLU record on the Datalogic Memor™, change the price (price level 1), save and post the change to POSperfect! No need to go back to the PC!

Order Entry:

Inwards goods can now complete a Purchase Order document by raising the document on the Datalogic Memor™ and receipting and posting! No need to go back to the PC!

Queue Busting:

The contents of a shopping cart can be scanned prior to checkout – a card presented to checkout operator and – on scanning the card – the full transaction automatically appears on POSperfect.
